GUILD

GUITARS

Incomparably The Finest Guitars that Pride and Skill *Can Create*

What can we say about GUILD GUITARS that would mean as much to you as the honest opinion of the stars who play them?

Ask them about the qualities that count most in guitar performance—response and resonance, expressiveness and warmth, sweetness and appeal—and they will tell you that no instrument they have ever played provides them in such rich measure as the GUILD.

No wonder these gifted men and women regard their selection of GUILD GUITARS as an important milestone in their careers . . . a stairway to new and greater heights of professional progress and personal satisfaction.

What's the secret of GUILD'S unique and distinctive performance? A special, exclusive method of treating the wood that gives the instruments tone quality many authorities have compared with Stradivarius violins.

Whether you are a student or a maestro, an amateur or a professional, your ears and musical sense will tell you, when you first play a GUILD, that you have come to the end of your search for the finest in guitars.

BETTY REILLY..

"The Irish Senorita," internationally famous
entertainer, plays GUILD GUITARS

GUILD ELECTRIC GUITARS

GUILD "STUART—500"—Masterpiece of perfection in Spanish electric guitars.

Ivoroid bound neck and head plate. The neck is of 5 piece selected hard maple construction with Adjusto steel truss rod and fingerboard of finest selected rosewood with 8 two-tone deluxe mother-of-pearl position markers. New popular short action professional scale.

The cutaway body measures 17" x 21" x 3/4". Sides and back are of highly flamed choice curly maple . . . top is select fine grain spruce. Finest 8 ply binding on top and back.

Complete versatility is provided by two built-in Guild "Frequency Tested" pickups with two volume and two tone controls, plus exclusive Guild toggle for instant selection of any one or combination of any two pickups. This arrangement, with the individual string adjustment screws, allows an endless variety of tonal color and perfect tonal balance.

All metal parts richly gold plated . . . fully enclosed tuning pegs . . . top professional construction and parts throughout . . . equipped with Guild "Rite Slant" wound stainless steel strings . . . the "strings of the stars."

No. 725. Sunburst Finish **\$445.00**

No. 726. Satin Blonde Finish..... **465.00**

GUILD "STRATFORD—350"—A Thoroughbred Spanish Electric Professional Model.

Extra slim, fast action neck of 3-piece hard maple construction with Adjusto steel truss rod.

The ivoroid bound fingerboard is of finest select rosewood and has 8 large mother-of-pearl position markers. New popular short-action professional scale.

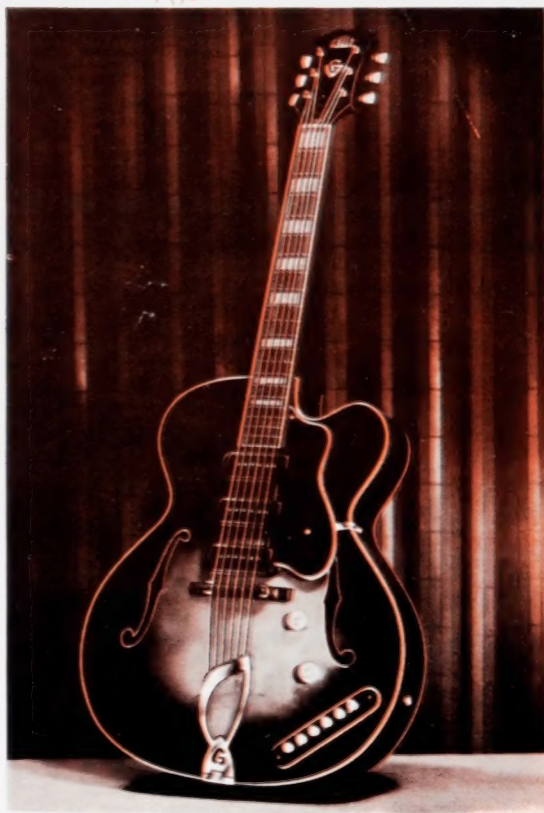

The body of fine selected maple and spruce hardwoods, measures 17" x 21" x 3/4", and has triple contrast binding on front and back. Gracefully arched top and back.

Three built-in Guild "Frequency Tested" pickups with volume and tone controls, plus automatic "Multi-switch" changer for instantaneous selection of any one or combination of any two or three pickups provide the versatility of an electric organ at the fingertips of the player. Push button markings are: "B" for bass; "M" for middle tones; "T" for high treble; "TM" for treble-middle tones combined; "TB" for treble-bass tones combined; "MB" for middle and bass tones combined. By depressing the last two buttons, all three pickups are activated. Individual string adjustment screws allow for perfect tonal balance of all strings.

Metal parts heavily gold plated . . . compensating bridge of fine selected rosewood . . . professional type construction and parts throughout . . . supplied with Guild "Rite Slant" stainless steel wound strings . . . "the strings of the stars."
